DETAILED ACTION

Claims 1-7 and 10-18 are pending in the application and were examined on their merits.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/24/06 has been entered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims

Art Unit: 1655

are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 7, 10, 17 and 18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,767,566 B2. Although the conflicting claims are not identical, they are not

Art Unit: 1655

patentably distinct from each other because claims 1-4, 7, 10, 17 and 18 are made obvious by claims 1-10 of '566 in light of the Specification.

Claims 1-10 of '566 teach every element of Instant claims 1-4, 7, 10, 17 and 18 except for heating the extract material and the particular temperatures to where the extract is heated. One of ordinary skill in the art would have been motivated to heat the extraction slurry to the specific temperatures as recited in claims 4 and 7 because claim 1 of '566 recites '(d) recovering said liquid fraction from said slurry to obtain a proteinase inhibitor'. It is clear from the Specification that the only 'recovery' step, is heating of the slurry to obtain a precipitate (see Example 1, where the slurry is heated to 70 °C for 10 min.).

This rejection has been reinstated for the following reason:

This original rejection was made in the Office Action dated 7/28/05. Applicants response to the Office Action on 10/31/05 indicated that a Terminal disclaimer had been sent with the Amendment. However, a Terminal disclaimer is not found in the case, and a fee for a Terminal Disclaimer has not been paid (please see PALM for details).

Claims 5-6 and 11-16 are objected to for being dependant upon a rejected claim.
